

Some tricks to a better use of The Sims Bodyshop, the built-in tool of The Sims 2 to create sims and some other stuff....

Code	Meaning	Example
F3	Angle of view	-Press the F3 key together

F5	Custom background	-Press F5 key to change the background resolution and
----	--------------------------	---

F6	Change sim pose	(this is applied until next)
----	------------------------	------------------------------

F7	Zoom out	-Full body view-
----	-----------------	------------------

F8	Zoom in	-Face view-
----	----------------	-------------

F9

Only sim

- if you press F9 key you can hide the bodyshop into
